

# CÉLESTE

a creation by  
**LILA MAGNIN**

**Céleste** is a piece that aims to share different **facets of femininity**, of women, and with performers/artists from **different backgrounds**. In this piece, I wish to highlight both the **strength** and the **softness** of women, through **movement** and **presence**, based on the notions of Yin and Yang. How to make feminine energy (directed inwards, among other things) exist in dance while using movement or action, which is considered as a masculine energy?

In this form, I try to let us exist with **all of our facets**.

This piece is a continuation of my first solo, **Azad**, which also questions the feminine and masculine experienced inside the body of a woman, as well as all the complexities of femininity. This solo came after my first piece **the #roof is on fire**, a piece performed only by men, questioning **conformity**, the **group effect** and **relationships**. Directing only men stimulated me to explore my own femininity. After several years of research, and different projects around the same theme, it is in the exploration of femininity and women overall through other artists that I wish to move forward. In this piece, I want to find out how to be **authentically oneself beyond the imposed characteristics**.

Beyond the feminine and masculine, which are the basis of everything, **representing the opposite and complementarity**, I want to explore resilience. How do we draw from ourselves to find the strength to keep going when we feel defeated?

This piece is intended to be an **empowerment tool** for everyone present. In all the power that lies within us, in the power of the **goddess Katyanani** who represents **divine femininity** in all its strength, as well as in the **lightness** that is **fun** and **entertainment**.

# 02 TECHNICAL CONDITIONS

03

The show lasts 20 minutes.

The team is available to invent with you the best playing conditions.

**Team on tour** : ?? personnes
